My name is Mark Crawford, and I have been guiding fly fishing trips on the Spring River out of Mammoth Spring, Arkansas for four years. Mammoth Spring is the outlet of an underground river that starts in Howell County, Missouri and flows south through Fulton and Sharp Counties in Arkansas. Over 9 million gallons of water per hour flow out of Mammoth Spring at a constant 58°, which is ideal to support a large population of diverse fish. It is the largest spring in Arkansas and the 10th largest spring in the world.

My greatest joy is teaching people how to catch trout on a fly rod. Old or young, experienced or not, I'll show you how to catch trout. There is no greater thrill than watching someone catch their first trout on one of my fly patterns.

Dam number 3 is my primary access point and it offers fantastic trout opportunities. I fish this area almost daily. I know the area well and only guide on the Spring River. All of my flies were designed or modified by me to use on the Spring River. Some of my flies are works of pure genius, but maybe I'm just a little biased!

If you have never fly fished before, come down and let me teach you. I believe fly fishing should be fun and relaxing. so plan on having a good time. I hope to see you soon!
